Re: Request for Information Regarding the Radiation - Standard Precision, Inc. Site,
Wichita, Kansas

Dear Mr. Edwards III:

This letter seeks your cooperation in providing information and documents relating to the contamination at the Radiation Standard Precision, Inc. Site, formerly located at 4105 to 4129 West Pawnee Street in Wichita, Kansas. The U.S. Environmental Protection Agency is sending this Request for Information because you are the co-trustee of the current owner of the Site, the Maurice J. Edwards, Jr. Generation Skipping Trust and President of Maurice J. Edwards, Jr. Generation Skipping Trust, Inc., the current operator of the Site. We encourage you to give this matter your immediate attention and that you provide a complete and truthful response to this Information Request and attached questions (Attachment B) within thirty (30) days of your receipt of this letter.

The EPA is investigating the release or threat of release of hazardous substances, pollutants, or contaminants at the Site. The EPA is seeking to obtain information concerning the generation, storage, treatment, transportation, and disposal methods of such substances that have been or threaten to be released from the Site. The EPA is attempting to determine what types of activities may have lead to contamination at the Site. The EPA believes that the Maurice J. Edwards, Jr. Generation Skipping Trust may have information which may assist the EPA in its investigation of the Site because EPA has identified the Maurice J. Edwards, Jr. Generation Skipping Trust as the current owner of the Site. The EPA believes that the Maurice J. Edwards, Jr. Generation Skipping Trust may have information, which may assist the EPA in its investigation of the Site because the EPA has identified Maurice J. Edwards, Jr. Generation Skipping Trust, Inc., as the current operator of the Site.

The Site is located at 4105 to 4129 West Pawnee Street, Wichita, Kansas. Standard Precision, Inc. operated a radium dial shop at 4125 West Pawnee Street from 1963 until approximately 1973 conducting aircraft dial stripping operations. During this process, paint containing radium was stripped from the dials with solvent prior to the dials being repaired.

In November 2006, and February 2007, a radiological surface soil survey was conducted by the Kansas Department of Health and Environment of the former Standard Precision, Inc. Samples were analyzed for radium-226. Elevated radium concentrations exceeding the standard established at 40 C.F.R. § 192.12 of a cleanup level not to exceed background plus five pCi/g. Levels of radium- 226 as high as 501 and 5,680 pCi/gram were found at 4105 West Pawnee Street.
